

A³ Intermediate Problem Set 2

This problem set will focus around binary search, which is *extremely* common in *USACO*. You can read about the different templates for binary search [here](#).

Question 1: [Leetcode 34. First, Last in Sorted Array](#)

Question 2: [USACO 2018 Silver: Convention](#)

Question 3: [USACO 2020 Silver: Wormhole Sort](#)

This one is probably too hard; it requires pretty good knowledge of graph algorithms. If this is too challenging for you now, revisit it in the future!

Formatting

```
In [1]: from IPython.core.display import display, HTML
display(HTML("<style>.container { width:85% !important; }</style>"))
```
